

Hawkbit

The website structure and content manager for small businesses, clubs, charities and other organisations.

Pages can be edited from any on-line computer.

Run and maintain your own website using only word-processing skills.

Hawkbit is our range of CMS websites built around Joomla! , an award winning Content Management Website system. Best of all, Joomla! is an Open Source solution which means we can offer you a fantastic versatile, professional quality web site at amazingly low prices. Open Source also brings you freedom, you are not locked in to a proprietary system that only works on one companies servers.

CMS sites are ideal for sites with frequently changing content. The beauty of Hawkbit is that the content of the site can be easily updated by your staff from any computer with internet access, from any location in the world. No special software is needed and no knowledge of HTML required - your staff can simply login to the website with special access to edit the content of the site via the web browser. The design and layout are not altered by what they do, only the text (and pictures).

Key Features

We provide the initial web design and features to your requirements. From then on your staff are free to edit the content as you please with no requirement for web design staff involvement. Full support is included in the price so if you do get stuck help is at hand from this web site, by email and bt telephone.

Hawkbit is perfect for any site where you wish to keep the content up to date, show special offers, new products, company news etc. without any outside assistance.

Hawkbit features our business class hosting:

- Registration of any available domain name for your company.
- eg yourcompany.co.uk or your organisation.org.uk for your web and email addresses.
- Dynamic web space to host your site.
- Up to 20 E-mail accounts.
- Web visitor statistics.

- Web site design.

There is also a wide range of add-on features/components that can easily be provided with your Hawkbit site.

- Customer/user registration
- Mass email to those registered / Newsletter
- Online events calendar
- Special content only for registered users, online documentation and document archives etc.
- Polls, Forums, Statistics, Newsflashes, Games etc.
- Image and multimedia galleries.
- Blogging software
- Subscription services.

Pricing

All this from Â£500+VAT, dependent on the amount and complexity of the content and hosting features required. Cost includes 2 years UK domain registration fees and 1 year hosting and support fees.

The annual web hosting, email account and support fee is Â£150 +VAT

For a FREE CONSULTATION Email or phone us today with your requirements

Training

We provide full documentation and user manuals for Hawkbit products. Combined with Hawkbit's ease of use and our on line forums, email and telephone support we believe you'll be up and operating your site in no time

However if you require on site training, this is charged at Â£200+VAT per half day session.

This is carried out on your own premises and the fee allows as many staff as you like to attend.

The majority of organisations find a single session more than adequate.

Support when you need it, the way you want it

With Ondev Hawkbit packages, we provide premium level 'real person' support when you need it. No waiting in line, no phone tag, just results.

We do it all for you

When you choose Ondev ArrowHead, we handle the complete installation for you. We install the product on your web site, fully test it, initialise the program settings, and check out all features to make sure they operate, as you desire.

We then work with you, to customise your site to meet your specific needs. This can include, colours, fonts, logos, and graphics - just about anything you can imagine.

After the initial installation and set up has been completed, we offer complete training to ensure you and your staff are familiar with the power that Ondev Hawkbit provides.

Premium Level Support

With our premium level support (included at no extra cost), any software problems you have are handled by our team of programmers. Check the support forum in your Master Control Panel first, someone else may have the same problem and the answer may already be there. If not post your problem to the forum and one of our programmers will either post the solution or email you, or even arrange a visit to you if closer support is needed.

Going the Extra Mile

Wondering how good our support really is? We invite you to call any of our current clients and ask them. They can tell you why our Premium level of support is like 'having a programmer on call'.

Do you want the functions of a CMS but need someone to manage it?

We can offer this service too - see the Design page for details.
